HOLY AMERICAN EMPIRE

Official Declaration

HAE-DEC-001

Issuing office

Holy American Empire

Date issued

2026-11-17

Subject

Declaration of Moon Ownership

Declaration

The issuing office hereby declares:

The Holy American Empire hereby declares its claim of ownership of the Moon.

This declaration expresses the Empire's intention to care for the Moon, support peaceful exploration, and preserve its scientific and natural heritage.

Allocation schedule revised 2026-11-18: the USA, France, Russia and China each receive 2,000,000,000 acres, divided equally into 1,000,000,000 acres on the Earth-facing near side and 1,000,000,000 acres on the far side.

Alexander Durchdenwald's remaining allocation is approximately 1,374,361,438 acres, also divided equally between both hemispheres. His reserve is 250,000,000 acres: 125,000,000 on each side, excluded from sale. The remaining sales allocation is divided equally between both sides and offered at USD $20 per acre. The catalog contains 1,124,361,436 whole-acre sale parcels; fractional remainders totaling approximately 1.686 acres are withheld.

HAE-MAP-006 / Revision 2 and its parcel register define the allocation boundaries. This schedule supersedes the earlier geographic allocation. Both hemispheres experience daylight and night. Country sale records, Alexander's sales, and his reserve remain separately identified.

Anyone seeking lunar land or conducting activities on the Moon must consult the Moon Director, confirm the current parcel reference, and submit the appropriate forms. An application does not complete a sale or issue a title; verified completed sales and issued titles are recorded by the office.

This declaration records the claim and allocation schedule of the Holy American Empire.
